CUT-IT MONO

Windshield removal system

Cut-it Mono is our latest windshield removal system. It is the result of the combination of experience from our previous models and customer inputs.

Cut-it MONO is the first and only system on the market having only one suction cup and it is possible to work either with steel wire or PE fiber wire.

Only 70% of windshields can be removed with PE fiber wire. Therefore the alternative to use als the steel wire is a must for a complete system.

The unit is very light, fast and does work without any adfional pulley. The Cut-it MONO has a built in ratchet mechanism and the spool winding up the wire serves as pulley for corners at the same time.

Content:

- CUT-IT MONO
- 25m Power Fiber
- 50m Square Steel wire in a dispenser
- Piercing tool
- Transparent protector
- Tool box with EVA Foam Inlay
