Flatpad set

Supplier:KAMATEC GmbH

Model	Article no.:	Price / Complete
> Flatpad	440000	LP399.00EUR

Use

The Flatpad is made of a fabric-reinforced plastic which means that it can be subjected to high pressures. Large dents and dings in the exterior panels of cars and trucks can be eliminated quickly and easily. The Flatpad is fitted on the back of the body panel and pressure is exerted, rendering damage to doors and side walls of the vehicle invisible. The Flatpad expands the Flatliner Full System. In conjunction with the Flatliner it is possible to carry out the preparatory work with the Flatpad from the inside and then perform the rest of the bumping-out work with the Flatliner from the outside.

Suitable for:

Vehicle type	Passenger cars, Cross-country vehicles (G- / M-Class), Vans, Trucks, Buses
Brand	Mercedes-Benz, Maybach, EvoBus
Workshop area	Bodywork

Scope of supply

Package contents/accessories: See additional information (accessories)

Quality assurance / utility value retention
